

Preserving Life and Beauty through Nutrition

Brine Shrimp Eggs

General information

Our *Artemia* Cysts, also known as *Brine Shrimp Eggs*, have a hatching percentage of more than 90%. They will hatch into *Artemia nauplii* (baby brine shrimp) in 18 to 30 hours. *Artemia nauplii* are known to be the ideal live food for the first stages of many marine and freshwater tropical fish and for many invertebrates.
